RESPONSE TO AMENDMENT

1. Claims 1-18 are pending in the application, claims 8-11 are withdrawn from consideration.

2. Amendments to the specification and claims, filed on May 9, 2006, have been entered in the above-identified application.

REJECTIONS

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

4. Claims 1, 2 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Vaux (U.S. Patent No. 4,991,834).

Vaux discloses a mat (col. 4, line 52) comprising a mat base having a top surface and a bottom surface, a plurality of long legs (col. 6, line 52) perpendicularly attached to the bottom surface of the mat base with is deemed to be for resiliently supporting the mat base and a plurality of short legs perpendicularly (col. 6, line 48) attached to the bottom surface of the mat base deemed to be for supporting the mat base and modifying the resiliency of the mat. Also, the long legs and the short legs are deemed capable of providing a selected mat compression when a load is applied to the top surface of the mat, since the mat comprises the claimed long and short legs. The mat further comprises a plurality of ribs wherein each rib connects a pair of legs and

wherein the length perpendicular to the mat of each rib is approximately the length of the legs to which it is attached, but not longer than either of the legs to which it is attached (col. 6, line 57 and figures 4b, 4c and 6a).

The limitation "for preventing the mat from becoming embedded within a floor grating which it sits" is deemed to be a statement with regard to the intended use and is not further limiting in so far as the structure of the product is concerned. In article claims, a claimed intended use must result in a *structural difference* between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. MPEP § 2111.02.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (U.S. Patent No. 2,810,672).

Taylor discloses a mat (title) comprising a mat base having a top surface and a bottom surface, a plurality of long legs (col. 2, line 72) perpendicularly attached to the bottom surface of the mat base with is deemed to be for resiliently supporting the mat base and a plurality of short legs perpendicularly (col. 3, line 1) attached to the bottom surface of the mat base deemed to be for supporting the mat base and modifying the resiliency of the mat. Also, the long legs and the short legs are deemed capable of providing a selected mat compression when a load is applied to the top surface of the mat, since the mat comprises the claimed long and short legs.

6. Claims 3 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Rope et al. (U.S. Patent No. 5,527,128).

Rope discloses a mat (ground cover, title) comprising a mat base having a top surface and a bottom surface and a plurality of channels subdividing the mat top surface into mat segments (figure 2), wherein each said channel has a floor and lateral wall surface and wherein the lateral

Application/Control Number: 10/811,590 Page 4

Art Unit: 1772

wall surface has a drain opening permitting drainage from the top surface of the mat to below the bottom surface of the mat (figure 3). The top surface of the mat is deemed to cover the drain opening (figure 3).

7. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Van Der Pyl (U.S. Patent No. 1,619,773).

Van Der Pyl discloses a mat comprising a mate base having a top surface and a bottom surface, a plurality of grit trenches embedded within the top surface of the mat, wherein each grit trench has two ends and each end has a retention lip forming a dam for retaining adhesive and grit and grit bonded into the trenches by an adhesive (col. 2, lines 58-62 and figure 2).

Claim Rejections - 35 USC § 103

8. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Der Pyl (U.S. Patent No. 1,619,773).

Van Der Pyl fails to disclose the claimed shape of the grit trenches.

It would have been an obvious matter of design choice to change the shape of the grit trenches, since a modification would have involved a mere change in size of the grit trench. A change in size or shape is generally recognized as being within the level of ordinary skill in the art, absent unexpected results. MPEP 2144.04 (I) and (IV).

Allowable Subject Matter

9. Claims 5-7, 15 and 16 are allowed.

Art Unit: 1772

ANSWERS TO APPLICANT'S ARGUMENTS

10. Applicant's arguments in the response filed May 9, 2006 regarding the previous rejections of record have been considered but are most since the rejections have been withdrawn.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia Chevalier whose telephone number is (571) 272-1490. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon, can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
